# CHAPTER 1

---

## Introduction

---

This document presents a test plan for the qualification of the design of the EPS 2.0 module, developed for the Floripasat-2 service platform.

The main purpose of this test plan is to ensure that the design of the module is capable of performing in accordance with its specifications. A secondary objective is to generate data regarding the performance of this module for later comparison with different designs developed at SpaceLab.

## CHAPTER 2

---

### Product Presentation

---

For the execution of this test plan, dedicated qualification models of the EPS 2.0 shall be used.
